

**IoT and AI is a key Asset Class
for sophisticated Capital**
automations, AI, security, less cost
needs a sovereign Platform uplift . . . DX

leaders are winners here!

Capital is an outsized winner
Clients and productivity are winners

How long can Businesses afford temporary solutions for security and unsustainable cost in defending against disruption, by continuing operations with their existing at-risk legacy IT networks?

Welcome to the essential upgrade with a DX to a modern Cloud that OneSense.io delivers.

The alternative for consultant led solutions that sound hip, but you know they are run-away expensive whether as:

- Diverse AI for consumer level script writing (*faster and social but not great revenue Business*)
- Cyber Security layer over existing Networks (*short term fixes one costly application at a time*)
- Managed Cloud Services (*when you don't know, believe the sales Consultant . . .!*)

Then there is the Mag7 hyperscalers bringing new tools for flipping to the Cloud simply for your old data loads largely for the same risks; but what next? Are you any better off from Consult-led transition to a proprietary Cloud under the pretext of data management or mythical AI as little more than nice to have?

Future growth and competitiveness for smart Business at scale comes from AI automation(s). AI is the Future of Business but not simple consumer AI for personal convenience born out of Social media data, but smart enterprise AI leveraging IoT and devices for real productivity in operations at lower cost.

OneSense.io is that modern foundational Platform for IoT and AI, applying OneSense connections with device security against risk, that doesn't cost to defend, and will not need massive skilled resources or significant time to deploy. OneSense.io delivers this secure modern Cloud infrastructure in a Platform as a Service (PaaS) leaving smart business free to build revenues leveraging high value autonomous Client services for any industry or application.

OneSense.io is real, ubiquitous technology now available on-demand . . . *in a class of its own!*

OneSense.io is also the inevitable upgrade for legacy IT networks needing Digital Transformation (DX) essential for Operational Technology (OT) **for enterprise Business, that Capital Has Been Waiting For"**

What will OneSense change with Capital? Industrial Automations at scale for Companies to uplift, expand and disrupt wider and disparate markets anywhere from lean operating systems and AI; needing less skilled and high-cost resources with more competitive capability to achieve sustainable revenue(s).

OneSense.io is part . Megatrend and . fully . Hyperscale, all in one Place with Capital as the Catalyst

"Humans have always been inventive, but the speed of progress depends on capital. The more capital and the lower the cost, the faster technology propagates."

Viktor Shvets Macquarie strategist

Today, smart secure technology is no longer a cost barrier for markets or just about hardware or software. It's about intuitive integration, sovereignty, latency, compliance, control using device driven data solutions in a risk avoidance framework in lean operations at scale for new Business revenues.

OneSense.io is sovereign, AI-native infrastructure designed to collapse cost, accelerate deployment, and unlock capital efficiency using automation. It's not just faster—it's fully integrated, on-demand infrastructure for IoT in a modern Cloud on Azure digital Infrastructure. *There is no other way!*

The Argument – Why OneSense.io Wins

Let's break it down.

Capital Efficiency

OneSense.io reduces the cost of Platform use and device integration deployment by up to 70% compared to legacy Clouds particularly those over 2 years old, needing 3rd party integrations and disparate sourced hardware (i.e. most big players!). Every dollar invested goes further—because the platform is built to do more, securely, with less.

Global Sovereign Infrastructure from AU

In sophisticated global markets, sovereignty is a mandate. This isn't just about compliance—it's about strategic performance and where Investors want defensible assets. Governments want local resilience. OneSense.io delivers both.

AI-Native by Design

While others retrofit AI into legacy stacks, OneSense.io was born agentic. Its architecture anticipates autonomous decision-making, real-time optimization, and low-latency data resources. This means smarter applications, faster diagnostics, remote and mobile performance and infrastructure that adapts—not just reacts.

Recurring Revenue, Not Just Deployment Fees

OneSense.io isn't a one-off integration—it's a platform with sticky economics. All capabilities are embedded as the key foundation for enterprise AI that generates predictable, multi-stream recurring revenue.

Revenues are further amplified using our strategic Business models. OneSense.io provides for any size enterprise, distributor, aggregator, subsidiary entity and sovereign players to leverage a high-technology Platform with simplified client-driven integrations and configurations without the need for scarce skilled labour, without CAPEX costs and billed only for the resources used.

An identifiable next large Cap megatrend – back your fund with agile and tech savvy innovation here!

– industry war room strategies for Capital ~ compare OneSense.io

- Address a large market where something is changing, across the entire industrial landscape
- Next Generation dependent customer base – customer perception
- Delivering creative vision, for change to Modern infrastructure, with aligned founder - attracting capital and talent
- Deploying a profitable business model – self funded where capital comes in and comes out so not affected by whims of the debt capital market
 - » Highly profitable, especially for financial and operational benefit for its customers
 - » Leveraging what is not going to change – this startup has built from leading infrastructure (Nvidia / Azure) development tools and using OneSense (proprietary) trusted hardware foundations.
 - » Growing revenues organically from compound growth – flywheel strength with new, evolving and regulation innovation technology to support change in a fast-paced cadence. Compete by being a mile ahead. Nvidia is on a one-year cadence of innovations!

Repeat: OneSense.io is notionally that strategic identifiable large cap of the future . . . with Capital. Collaborate (to help list . . and only if essential) and drive this valuable opportunity.

The Call – Capital wants Velocity for growth in Valuation. OneSense.io Delivers on all these fronts.

So what does this mean for investors and strategic partners?

- It means OneSense.io is an investor ready unique megatrend opportunity that is designed to be a significant private business or when the wind blows to become a large cap.
- It means select strategic partners can leverage the capability of the leading-edge technology for AI to drive the propagation of OneSense.io capability and value.

OneSense.io strength is from a critical infrastructure Platform for broad addressable markets in regulated and emerging environments to setup for the Future of Business, that converts capital into a high-velocity arbitrage strategy, unlocking access to high-return, liquid asset plays.

Wisper! there is more, with ongoing alternative development(s)! OneSense.io is not resting on the foundation infrastructure for AI of the Future, OneSense.io is building additional core capability in the context of resilience, communications networks and AI whist supporting Nature for Sustainability that uses the Platform for quantitative, real time, trusted data to drive operations and compliance that the Tenant owns and controls designed to also enclose the envelope for Security by Design!

Why? Because it's the platform that aligns with sovereign priorities; operational security, reduces operational overhead, and scales without friction and it's the answer to the question demanded for c-suite performance: *"How do we deploy faster, smarter, and with more control?"*

We're not asking you to bet on a trend. We're inviting you to back the platform that makes trends deployable. The future doesn't wait. Neither should capital.

Let's deploy this essential Infrastructure Capital opportunity.

Forward-Looking Statement

This presentation contains forward-looking statements that reflect current expectations regarding future performance, market conditions, and strategic initiatives. These statements are subject to risks and uncertainties that may cause actual results to differ materially from those projected. Factors such as regulatory changes, macroeconomic shifts, competitive dynamics, and technological evolution may impact outcomes. We undertake no obligation to update these statements, except as required by law.
